SECTION C

INDEX TO VOLUME 27

Authors

Adams, A. M.—A convenient method of obtaining ascospores from bakers' yeast, 179.

Andreae, S. R. and Andreae, W. A.—The metabolism of scopoletin by healthy and virus infected potato tubers, 15.

Andreae, W. A.—See Andreae, S. R.

Arnason, T. J. and Walker, G. W. R.—An irreversible gene-induced plastid mutation, 172.

Bishop, C. J., McLaughlin, V. D., and Tapley, D. F.—X-ray tolerance of living cells as measured by cytoplasmic streaming, 262.

Brown, A. M. and Johnson, T.—Studies on variation in pathogenicity in leaf rust of wheat, *Puccinia triticina* Erikss., 191.

Buckland, D. C., Foster, R. E., and Nordin, V. J.—Studies in forest pathology. VII. Decay in western hemlock and fir in the Franklin River area, British Columbia, 312.

Campbell, J. J. R., Norris, F. C., and Norris, M. E.—The intermediate metabolism of *Pseudomonas aeruginosa*. II. Limitations of simultaneous adaptation as applied to the identification of acetic acid, an intermediate in glucose oxidation, 165.
See Norris, F. C.

Campbell, N. E. R.—See James, N.

Colvin, J. R. and McCalla, A. G.—Physical and chemical properties of gluten. I. Estimation of molecular properties using electrophoretic and diffusion data, 103.

Cormack, R. G. H.—A study of trout streamside cover in logged-over and undisturbed virgin spruce woods, 78.

Dearden, E. R.—See Jackson, H. S.

Duff, G. H. and Forward, D. F.—Physiological and biochemical studies in plant metabolism. I. The respiration of the seedling wheat leaf in starvation and ontogeny, 125.

Forward, D. F.—See Duff, G. H.

Foster, R. E.—See Buckland, D. C.

Grant, M. N. and McCalla, A. G.—Yield and protein content of wheat and barley. I. Interrelation of yield and protein content of random selections from single crosses, 230.

Gunner, C.—See James, N.

Hildebrand, A. A., McKeen, W. E., and Koch, L. W.—Row treatment of soil with tetramethylthiuram disulphide for control of blackroot of sugar-beet seedlings. I. Greenhouse tests, 23.

Huskins, C. L. and Sander, G. F.—Mutations in polyploid cereals. I. Introductory outline, 332.
See Smith, S. G.

Jackson, H. S.—Studies of Canadian Thelephoraceae. IV. *Corticium anceps* in North America, 241.

———— and Dearden, E. R.—Studies of Canadian Thelephoraceae. III. Some new species from British Columbia, 147.

James, N., Campbell, N. E. R., and Gunner, C.—Fundamental studies on a saltant of *Helminthosporium sativum*, 274.

Johnson, T.—Inheritance of pathogenicity and urediospore color in crosses between physiologic races of oat stem rust, 203.
Intervarietal crosses in *Puccinia graminis*, 45.
See Brown, A. M.

Koch, L. W.—See Hildebrand, A. A.

Loeb, L.—See Peterson, R.

McCalla, A. G.—See Colvin, J. R.; Grant, M. N.; Wetter, L. R.

McKeen, W. E.—A study of sugar beet rootrot in Southern Ontario, 284.
See Hildebrand, A. A.

McLaughlin, V. D.—See Bishop, C. J.

Macpherson, M. G. and Young, E. G.—The chemical composition of marine algae, 73.

Moss, E. H.—Natural pine hybrids in Alberta, 218.

Newton, J. D.—See Simpson, F. J.

Ney, P. W.—See Norris, F. C.

Nordin, V. J.—See Buckland, D. C.

Norris, F. C. and Campbell, J. J. R.—The intermediate metabolism of *Pseudomonas aeruginosa*. III. The application of paper chromatography to the identification of gluconic and 2-ketogluconic acids, intermediates in glucose oxidation, 253.
————, Campbell, J. J. R., and Ney, P. W.—The intermediate metabolism of *Pseudomonas aeruginosa*. I. The status of the endogenous respiration, 157.
See Campbell, J. J. R.

Norris, M. E.—See Campbell, J. J. R.

Peterson, R., Rose, D., and Loeb, L.—Influence of the amino acid-dextrose reaction on growth of *Bacillus polymyxa*, 269.

Rose, D.—See Peterson, R.

Sander, G. F.—See Huskins, C. L.; Smith, S. G.

Simpson, F. J. and Newton, J. D.—Studies on steam sterilization of soils. II. Some factors affecting minimum sterilization requirements, 1.

Smith, S. G., Huskins, C. L., and Sander, G. F.—Mutations in polyploid cereals. II. The cytogenetics of speltoid wheats, 348.

Tapley, D. F.—See Bishop, C. J.

Walker, G. W. R.—See Arnason, T. J.

Wetter, L. R. and McCalla, A. G.—Electrophoretic properties of pea proteins, 96.

Wu, Y.-S.—Temperature and cultural studies on *Urocystis tritici* Koern., 66.

Young, E. G.—See Macpherson, M. G.

SECTION C

INDEX TO VOLUME 27

Subjects

Acetic acid, an intermediate in glucose oxidation by *Pseudomonas aeruginosa*, Limitations of simultaneous adaptation in identification of, 165.

Adaptation, Simultaneous, in identification of acetic acid in glucose oxidation by *P. aeruginosa*, 165.

Alberta, Natural pine hybrids in, 218.

Algae, Marine, Chemical composition of, 73.

Amino acid – dextrose reaction, Influence of, on growth of *Bacillus polymyxa*, 269.

Ascospores, Method of obtaining, from bakers' yeast, 179.

Bacillus polymyxa, Influence of amino acid – dextrose reaction on, 269.

Bakers' yeast, Method of obtaining ascospores from, 179.

Barley, Yield and protein content of crosses of, with wheat, 230.

Blackroot of sugar beets, Effect of tetramethylthiuram disulphide in soil on, 23.

British Columbia
Decay in western hemlock and fir in Franklin River area, 312.
New Thelephoraceae from, 147.

Cereals, Polyploid, Mutations in
Cytogenetics of speltoid wheats, 348.
Introductory outline, 332.

Chemical composition of marine algae, 73.

Corticium anceps in North America, 241.

Crosses
Inter-racial, in *Puccinia triticina*, Inheritance of pathogenicity and urediospore color in, 203.
Intervarietal, in *Puccinia graminis*, 45.
of wheat and barley, Interrelation of yield and protein content in, 230.

Cultural studies of *Urocystis tritici*, 66.

Cytogenetics of speltoid wheats, 348.

Cytoplasmic streaming as measure of X-ray tolerance of living cells, 262.

Dextrose, See Amino acid.

Diffusion data, Molecular properties of gluten estimated by use of, 103.

Electrophoretic data, Molecular properties of gluten estimated by use of, 103.

Electrophoretic properties of pea proteins, 96.

Fir, Decay in, in British Columbia, 312.

Forest pathology, Decay in western hemlock and fir in Franklin River area, 312.

Gluconic acid, Identification of, as intermediate in glucose oxidation of *Pseudomonas aeruginosa*, 253.

Glucose oxidation by *Pseudomonas aeruginosa*
Identification of gluconic and 2-ketogluconic acids in, 253.
Limitation of simultaneous adaptation in identification of acetic acid in, 165.

Gluten, Molecular properties of, estimated from electrophoretic and diffusion data, 103.

Growth of *Bacillus polymyxa*, Influence of amino acid–dextrose reaction on, 269.

Helminthosporium sativum, Fundamental studies on saltant of, 274.

Hemlock, Western, Decay in, in British Columbia, 312.

Hybrids, Natural pine, in Alberta, 218.

Inheritance of pathogenicity and urediospore color in oat stem rust, 203.

2-Ketogluconic acid, Identification of, as intermediate in glucose oxidation by *Pseudomonas aeruginosa*, 253.

Leaf of wheat seedlings, Respiration of, in starvation and ontogeny, 125.

Leaf rust of wheat, Variation in pathogenicity of, 191.

Living cells, Measurement of X-ray tolerance of, 262.

Metabolism
of plants, Respiration of seedling wheat leaf in starvation and ontogeny, 125.
of *Pseudomonas aeruginosa*
Endogenous respiration, 157.
Identification of gluconic and 2-ketogluconic in glucose oxidation, 253.
Limitations of simultaneous adaptation in identification of acetic acid in glucose oxidation, 165.
of scopoletin by potato tubers, 15.

Molecular properties of gluten estimated by electrophoretic and diffusion data, 103.

Mutation(s)
in polyploid cereals
Cytogenetics of speltoid wheats, 348.
Introductory outline of, 332.
Irreversible gene-induced plastid, 172.

North America, *Corticium anceps* in, 241.

Oat stem rust, Inheritance of pathogenicity and urediospore color in, 203.

Paper chromatography applied in identification of gluconic and 2-ketogluconic acids in glucose oxidation by *Pseudomonas aeruginosa*, 253.

Pathogenicity
Inheritance of, in oat stem rust, 203.
Variation in, in leaf rust of wheat, 191.

Pea proteins, Electrophoretic properties of, 96.

Physiologic races of oat stem rust, Inheritance of pathogenicity and urediospore color in crosses between, 203.

Pine hybrids, Natural, in Alberta, 218.

Plant metabolism, Respiration of seedling wheat leaf in starvation and ontogeny, 125.

Plastid mutation, Irreversible gene-induced, 172.

Polyploid cereals, Mutations in
Cytogenetics of speltoid wheats, 348.
Introductory outline, 332.

Potato tubers, Metabolism of scopoletin by, 15.

Protein content of crosses of wheat and barley, 230.

Proteins of peas, Electrophoretic properties of, 96.

Pseudomonas aeruginosa
Endogenous respiration of, 157.
Identification of gluconic and 2-ketogluconic acids in glucose oxidation by, 253.
Limitations of simultaneous adaptation in identification of acetic acid in glucose oxidation by, 165.

Puccinia graminis, Intervarietal crosses in, 45.

Puccinia triticina, Variation in pathogenicity of, 191.

Respiration
Endogenous, of *Pseudomonas aeruginosa*, 157.
of seedling wheat leaf in starvation and ontogeny, 125.

Root rot of sugar beets in Southern Ontario, 284.

Rust
of oat stem, Inheritance of pathogenicity and urediospore color in, 203.
of wheat leaf, Pathogenicity in, 191.

Saltant of *Helminthosporium sativum*, Fundamental studies on, 274.

Scopoletin, Metabolism of, by potato tubers, 15.

Soil(s)
Effect of tetramethylthiuram disulphide in, on black root of sugar beets, 23.
Factors affecting requirements for steam sterilization of, 1.

Southern Ontario, Root rot of sugar beets, in, 284.

Speltoid wheats, Cytogenetics of, 348.

Spruce woods, Trout streamside cover in, 78.

Steam sterilization of soils, Factors affecting requirements for, 1.

Stem rust of oats, Inheritance of pathogenicity and urediospore color in, 203.

Sterilization of soil by steam, Factors affecting requirements for, 1.

Streamside cover, Trout, in spruce woods, 78.

Sugar beet root rot in Southern Ontario, 284.

Sugar beets, Effect of tetramethylthiuram disulphide in soil on blackroot of, 23.

Temperature studies on *Urocystis tritici*, 66.

Tetramethylthiuram disulphide in soil, Effect of, on blackroot of sugar beets, 23.

Thelephoraceae
Corticium anceps in North America, 241.
New species from British Columbia, 147.

Trout streamside cover in spruce woods, 78.

Tubers, Potato, Metabolism of scopoletin by, 15.

Urediospore color, Inheritance of, in oat stem rust, 203.

Urocystis tritici, Temperature and cultural studies on, 66.

Virus, Metabolism of scopoletin by potato tubers infected by, 15.

Western hemlock, Decay in, in British Columbia, 312.

Wheat,
crossed with barley, Yield and protein content of, 230.
Pathogenicity of leaf rust of, 191.
Respiration in starvation and ontogeny of leaf of seedling of, 125.
Speltoid, Cytogenetics of, 348.

X-ray tolerance of living cells, Measurement of, 262.

Yeast, Bakers', Method of obtaining ascospores from, 179.

Yield from crosses of wheat and barley, 230.
